

Requirements:

- A Sprint PCS Vision PPC-6700 smart device
- **The installation of ActiveSync 4.1** on the laptop or desktop onto which the software will be downloaded.
 - **Note:** You may not have the latest version of ActiveSync installed. To check your version open ActiveSync and click on **Help** and then **About Microsoft ActiveSync**.
 - ActiveSync 4.1 is available as a free download from Microsoft by going to <http://www.microsoft.com/downloads> from there on the left side of the page choose "mobile devices." *Note: On some laptops/desktops, "Administrator rights" may be required to install the ActiveSync update.*
 -

Installation Instructions:

- Download the file to a laptop/desktop.
- Connect the PPC-6700 to the laptop/desktop using the USB cable originally included with the PPC-6700
- double-click on the downloaded ".exe" file to start the installation process.
- Follow the onscreen instructions.

The upgrade procedure takes approximately 20 minutes.

New Features/Enhancements:

- DDTM turned off allowing voice call through when in a data session - DDTM is disabled and incoming voice calls will come in during EVDO data session.
- Now supports Wireless Data Roaming

Software Fixes:

- Fixed "Sprint Only" System Acquisition issue.
- Fixes PRL roaming bug where the handset locks onto one channel.
- Voice call termination caused tethered data call dropping.
- While on a call, the user cannot use a contact from the contact list to initiate a conference call.
